FOREST AND SHADE TREES.

The planting and cultivation of forest and shade trees adapted to the soil and climate of Nevada ought to be a remunerative business. It is perhaps not generally known that by "An Act to Encourage the Growth of Forest Trees," approved March 7, 1873, the Legislature provided for the payment of a liberal bounty for the planting and entrivation of such trees. Ten dollars per acre is to be paid by the State for trees planted one rod apart and cultivated and prorected for three years, and the bounty is to continue at this rate for twenty years, or during the cultivation of the trees. Ten dollars per mile is also to be paid for each line of trees planted one rod apart along any publie highway, and cultivated and protected as above stated. The Act prorides that any person wishing to avail himself of the bounty clause shalf, within two years after the planting of such trees, file in the County Clerk's office, in the county in which the trees are planted, a plat, and outlay. The new cards will be identical in size with the old ones. They will cost \$139 to minufacture, an will be ready for delivery about the middle of April.
